

ComEx switch module

for panel and railmounted installation

The ComEx switch module can be used in almost all potentially explosive areas, where machine functions need to be triggered by a button or a switch. ComEx switch modules are flexible in use and can be combined with a variety of Control and signal device actuators 07-3400-*.

All contacts of the ComEx switch module are self-cleaning, and the NC contacts feature positive opening. The connecting cable is connected to the ComEx switch module via screw terminals. The ComEx switch modules offer the option of simple and fast mounting on a rail- or a panel mounted installation per direct mounting to the ComEx actuator. The ComEx switch modules are developed and certified for globally market.

- Easy installation
- Certified for zone 1 and 21
- Operating temperature
 - 55 °C to +85 °C (-67 °F to +185 °F)
- Available in 2-pol and 4-pol variants
